

VALLOUREC &amp; MANNESMANN TUBES

## New Threading Mill in Nigeria

V & M TUBES celebrates the opening of its threading workshop in Onne: **VAM Onne Nigeria**. The brand new threading shop of V & M TUBES in Onne has been inaugurated on 8th of December 2009. More than hundred guests from all horizons (customers, Nigerian authorities, V & M TUBES in Nigeria and headquarter in France) came on that occasion and could see this very well laid out mill which now is the benchmark for the industry in Nigeria.

V & M TUBES is confident to continue supporting its historical customers in Nigeria and also convincing new operators. Besides the threading operations, V & M TUBES is able to supply the full range of global services (inspection, QA/QC, tallying, rig ready, offshore service etc...). The full team in Onne is fully motivated to bring to the local customers the same level of production and services as in any other V & M TUBES location in the world.
